# The Company

An aerial photograph of the Puleo SpA industrial facility. The main building is a long, white, single-story structure with a sign that reads "PULEO" above the entrance. There are two large dark doors on the right side of the building. In front of the building is a large asphalt parking lot with several cars parked. To the left of the parking lot, there are several palm trees and other plants. The background shows a hillside with some residential buildings and more palm trees. The sky is clear and blue.

Puleo SpA is an Italian company leader in the international industry for the design and production of hi-tech equipment for the winemaking process. The company was founded by an intuition of Nicolo' Puleo who **since 1968** has focused on investments towards research and innovation.

## The Company

The achievements attained over these five decades of hard work reflect the constant effort, by the company, to anticipate changes in an ever-evolving market and to successfully deploy expertise, passion and skill, along with relationships based on trust, whilst constantly striving for product improvement.

# The Company

Puleo focuses its activity on the production of equipment that make up the “Receiving and Pressing Line” (Sorting table, Destemmer, Pneumatic Presses, pumps and so on) with patent applications that enhance the brand and help consolidate Puleo’s prestigious position in the oenological industry.

PNEUMATIC PRESSES

RECEIVING AND  
SORTING SYSTEMS

# Patented Machines – PREXA INFINITY

The innovation introduced by Puleo S.p.A through the INFINITY places the idea of pressing under a protected atmosphere, without quantitative limits of inert gas, towards a more performing and advanced perspective. The press stands out for finding inert gas (namely Nitrogen) independently, by itself, by means of a molecular divider, from atmospheric air and make it available during the various processing cycles.

The new INFINITY system ensures unlimited availability of new nitrogen, with no need for recirculation and storage systems.

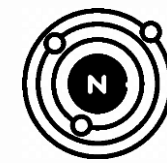

PREXA Ni INFINITY

# Advantages– PREXA INFINITY

1. Noticeably reduced inerting and pressing times.

2. Drastic reduction of the permanence of the must within the press, immediately extracted.

3. Unlimited and integrated availability of new nitrogen, up to 99,5% PURE.

4. High yield of qualitative and quantitative extraction of the must due to the continuous pressurization of inert gas.

5. Possibility of use the inert gas for the various processing in the cellar.

PREXA Ni INFINITY

# Innovation – VEGA R

The new unit VEGA R combines the efficient destemming action of " Vega" destemmers with an accurate berry sorting performed by ROLL SELECTO. Destemming and sorting done by a single UNIT and with a double advantage: reduction of overall size and single stalk disposal.

VEGA 15 R

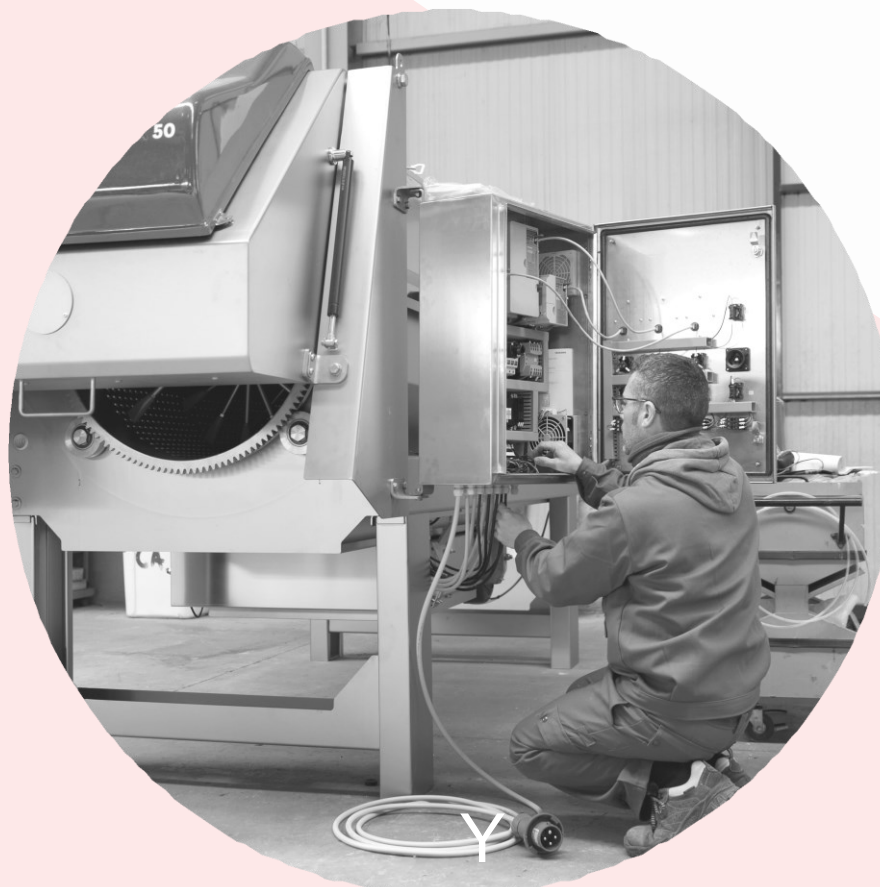

# The Company

It also has an extensive network of Agents and Distributors, located in the main wine regions that respond quickly to the needs of its customers. Puleo supplies its products to **more than 20 countries**, reaching every day new production records which are proof of its technological leadership in the field.

# The Company

A general overview of our activities and the various phases that make up the production processes is summarized in a [video](#)

# Post-sales & Service

The service is guaranteed at worldwide level, carried out by our authorized service center.

Number Service dedicated is +39 0923 1961289,.

We are the only ones in the wine market, to have designed a program, with a section dedicated to the maintenance: the PLC stores the working hours of the major components of the press (compressor, blower, motor, state membrane plc). This continuous monitoring allows us to predict and manage scheduled maintenance of the individual components, avoiding sudden breaks during the working phases.

WINE & FOOD TECH

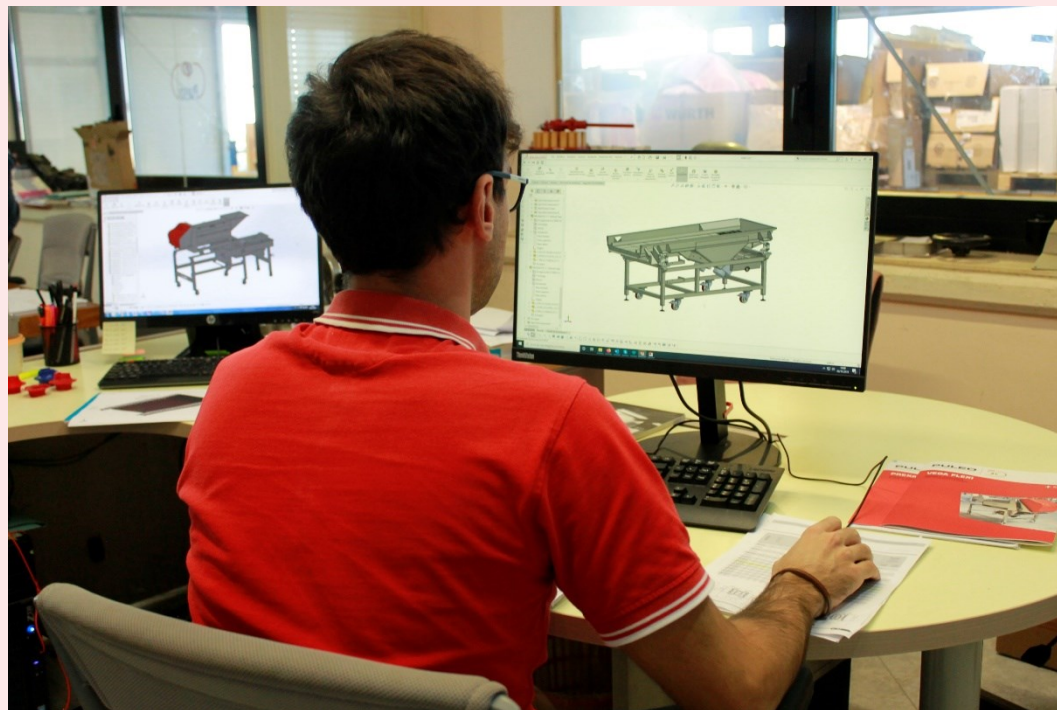

## RESEARCH & DEVELOPMENT

Constant research and innovation, together with dialogue with producers and experts in the sector, allow Puleo to implement improving and to offer technological solutions to optimize the performance of the process in terms of product quality, increasing in capacity, cutting of operating times and control of process and automation.

## Why choose Manufactured Puleo products?

For the **flexibility** to create concrete customized solutions, designed according to specific customer needs.

For the **constant quality** control of machines and components.

**PULEO**
